

ROHIT KALRA

Senior Cloud & Infrastructure Engineer | 13+ Years Experience

kalra.rohit01@gmail.com • +91 8860402556 • linkedin.com/in/rohit-kalra-4919942a

PROFESSIONAL SUMMARY

IT Infrastructure and Cloud Engineer with 13+ years of experience designing, managing, and optimizing enterprise infrastructure across AWS, Azure, and Google Cloud Platform. Skilled in leading server migrations, automating deployments with Terraform and Ansible, and maintaining SLA-driven, high-availability environments. Strong background in VMware virtualization, Windows Server administration, Kubernetes orchestration, and CI/CD pipeline implementation. MBA-qualified with the ability to bridge technical execution and business priorities.

CORE COMPETENCIES

- Cloud Platforms: AWS (EC2, S3, VPC, IAM, CloudWatch, NACL) | Azure (VMs, Storage, Networking, Monitor, Backup) | GCP (Compute Engine, VPC, GKE, IAM, Cloud Storage)
- Virtualization: VMware ESXi 5.5 / 6.0 / 6.5 — VM provisioning, cloning, snapshots, lifecycle management | Microsoft Hyper-V
- Operating Systems: Windows Server 2012 / 2016 / 2019 / 2022 | Working knowledge of Linux administration and troubleshooting
- DevOps & Automation: Terraform (IaC) | Ansible | Jenkins CI/CD pipelines | Docker | Kubernetes (EKS, AKS, GKE)
- Storage & Networking: NAS, SAN, Windows File Server | Active Directory, DHCP, DNS | WatchGuard Firewall
- Monitoring & ITSM: SolarWinds | Azure Monitor | CloudWatch | ServiceNow | BMC Remedy
- Backup & DR: Veeam | Symantec Backup Exec | Azure VM Backup | File-level Recovery

PROFESSIONAL EXPERIENCE

Cloud Infrastructure Engineer | Endava Solutions India Pvt. Ltd. (formerly Galax E Solutions India Pvt. Ltd.)

April 2024 – Present

- Administer and maintain multi-cloud infrastructure across AWS and Google Cloud Platform, ensuring high availability and performance for production workloads.
- Provision, configure, and manage virtual machines, Compute Engine instances, and cloud resources based on business requirements.
- Implement and manage IAM users, roles, and policies across cloud platforms, ensuring secure and compliant access control.
- Deploy and manage Kubernetes clusters, Pods, Services, and Deployments for containerized applications.
- Automate infrastructure provisioning using Terraform and Ansible, reducing manual effort and improving deployment consistency and speed.
- Design and manage CI/CD pipelines using Jenkins, enabling automated build and deployment workflows.
- Lead end-to-end server migration projects — planning, execution, validation, and optimization — across Windows Server 2016/2019/2022 environments.
- Monitor production systems using cloud-native monitoring tools, proactively resolving incidents and maintaining SLA compliance.

Cloud Administrator | Encora Innovation Labs India Pvt. Ltd.

June 2022 – March 2024

- Managed and supported multi-cloud infrastructure across Microsoft Azure and Google Cloud Platform, ensuring high availability and performance.
- Provisioned, configured, and maintained virtual machines, Compute instances, and cloud resources based on project and operational requirements.
- Administered IAM users, roles, and access policies, implementing secure access control and governance best practices.
- Designed and deployed Azure infrastructure including compute, networking, and storage services.
- Configured and managed Azure VM backup and file-level recovery, strengthening data protection and disaster recovery readiness.

- Implemented and managed a VMware ESXi virtualization environment, including VM provisioning, configuration, and maintenance.
- Monitored infrastructure using SolarWinds and Azure Monitor, proactively identifying and resolving performance and availability issues.

Windows & Azure Administrator | HCL Technologies Ltd.

November 2018 – May 2022

- Provisioned, migrated, and decommissioned Microsoft Azure virtual machines, supporting seamless cloud operations and resource optimization.
- Administered and supported Windows Server 2012 R2, 2016, and 2019 across physical and virtual environments.
- Configured, managed, and maintained VMware ESXi environments (5.5, 6.0, 6.5), including VM provisioning and performance optimization.
- Performed server builds, migrations, OS installations, patching, upgrades, and end-of-life activities, maintaining system stability and compliance.
- Executed data migration activities across NAS and SAN storage, ensuring data integrity and minimal downtime.
- Managed and resolved production incidents and service requests using ServiceNow and BMC Remedy, maintaining SLA compliance.

System Administrator | Pinaki Softcon Pvt. Ltd.

September 2017 – November 2018

- Implemented, configured, and managed a VMware ESXi virtualization environment, including VM provisioning and resource allocation.
- Executed file server data migration activities, maintaining data integrity, security, and minimal downtime.
- Built, decommissioned, and troubleshoot Windows Servers, including OS installation, configuration, patching, and issue resolution.
- Provided L2 infrastructure support, ensuring system availability and operational stability.

System Engineer | CI InfoTech India Pvt. Ltd. (Client: DMI Innovation India Pvt. Ltd.)

June 2016 – September 2017

- Administered Dell physical servers and the Active Directory environment, including user account management, group policies, and access control.
- Managed Symantec Endpoint Protection and Backup Exec, ensuring endpoint security, reliable backup scheduling, and successful data recovery.
- Configured and maintained the Microsoft Hyper-V virtualization platform and NAS storage, supporting optimal performance and availability.
- Implemented and supported WSUS patch management and WatchGuard firewall configuration, strengthening system security and compliance.
- Provided daily onsite L1/L2 technical support, troubleshooting infrastructure, server, and user issues within SLA timelines.

Implementation Engineer | KDDI India Pvt. Ltd.

May 2013 – June 2016

- Installed, rack-mounted, and configured HP, Dell, and IBM physical servers in data center environments.
- Implemented and administered Active Directory, DHCP, DNS, and File Server services, enabling secure authentication and centralized file access.
- Managed and monitored enterprise backup solutions using Veeam and Symantec Backup Exec, ensuring data protection and successful recovery.
- Configured and maintained NAS storage and Microsoft Hyper-V virtualization, supporting VM deployment and storage management.
- Gained hands-on experience with VMware ESXi 5.5, supporting virtual machine management and infrastructure operations.

CERTIFICATIONS

- Microsoft Certified Solutions Associate (MCSA) — Windows Server 2012 (Exams 70-410, 70-411)
- Microsoft Certified Professional (MCP) — Windows Server Administration

EDUCATION

- Master of Business Administration (MBA) — 2015
- Bachelor of Commerce (B.Com) — 2010
